PRINCETON
CENTER FOR
THEORETICAL
SCIENCE

Princeton Center for Theoretical Science
and the Department of Physics
present the
2018 Distinguished Visiting Lecturer

David Gross

Chancellor's Chair Professor of Theoretical Physics
Kavli Institute for Theoretical Physics
University of California, Santa Barbara
Nobel Laureate in Physics, 2004

Beyond Space and Time

I explore the evolving concepts of space
and time in physics.

Today our concepts of spacetime are once again
challenged as we struggle to understand
quantum gravity, unify the forces of nature,
and probe the beginning of the universe.

I discuss some of the ideas that are
currently advanced.
