

Princeton Center for *Theoretical* Science presents
Director's Lecture 2014

“TOY MODELS”

Tadashi Tokieda

Cambridge University/Radcliffe Institute, Harvard

Tuesday, February 11, 2014

2:00 pm

McDonnell Hall, Room A-02

Would you like to come see some toys?

‘Toys’ here have a special sense: physical objects from daily life which can be found or made in minutes but which, if played with imaginatively, reveal a behavior surprising enough to keep physicists intrigued for days. We will see table-top demos of several such toys and discuss the physics and mathematics that come out of them. Some of the toys will be well-known, some will be original, and all will be, we hope, entertaining.

Please stay for play time and refreshments
immediately following the presentation.
