

From Spectroscopy to Climate: Radiative Constraints on the General Circulation

The Princeton Center for Theoretical Sciences, in collaboration with the Program in Atmospheric and Oceanic Sciences, organizes a workshop on radiative constraints on the General Circulation and Climate at Princeton University from

August 22-24, 2022

The workshop is open and registration is free, but attendance is limited. Please register with a title and short abstract at <https://forms.gle/Jfhavckpoa6dpnaC7>

You will receive an email confirming your participation a few days after your registration is reviewed.

Confirmed speakers: Dennis Hartmann, Alison Ming, Keith Shine, Jake Seeley, Joao Teixeira, Nadir Jeevanjee
